

Operating instruction

P-Mix AHA TXP201

Pre-mixed material for powder coatings with alligator finishes

Description

AHA P-Mix is just one kind of pre-mixed material without pigment for **TXP201-XX** series powder coatings with alligator finishes, which is specially designed to help our customers keep texture consistency and better quality control. Therefore, if required, the customer only needs to add pigments into above **P-Mix**, then dry blending, extruding, grinding and classifying, thus the powder coating with alligator finishes will be gained easily.

Typical Texture Picture:

Operation instruction

- Adding pre-mixed material and normal dosage of pigments together into a high-speed blender and then dry blending uniformly;
- The resulting mixture is melt extruded in a proper extruder and chipped though ribbon form between a pair of chilled pinch rolls;
- Grinding above chips into fine powder by grinder, such as ACM classifier mill, sieving pass through 120-140 mesh sieve, the resulting dry, free flowing powder as base powder;
- Dry blending very little of **AHA1043*** (post-addition additive, the optimum use level 0.2%) into base powder from step 3 by proper ways, such as manual or V-typical blender under low shear force and low rotary rates.

Notice:

The key technical data or specifications for the above product described in this paper may be changed from time to time due to improvement constantly. AHA reserves the right to change the specifications of its products without prior notice.

Although the information in this paper is based on our own investigation and is believed reliable, **AHA** can not assume any responsibility for performance or results obtained through the use of our products herein described. Neither we nor our agents shall be liable for any injury, loss or damages directly or indirectly caused by our products. The user is held to check the quality, safety and all other properties of our product before using. Nothing herein is to be taken as permission or recommendation to practice any patented invention without a license.

Storage

Store in temperature between 2 and 35°C or cool dry place. Keep package closed after using. When stored in cool (<25°C), dry conditions – 12 months.

Health & Safety

Avoid contact with eyes and skin. Avoid breathing dust. Wash after handling.

For further information, please refer to the MSDS

Package

Carton with inner PE bag; Net weight: 20 ± 0.2 kgs

** Not for industrial sale product, friendly available along with pre-mixed material P-Mix AHA TXP201 only*
